

HEALTH, SAFETY, AND ENVIRONMENT

At Biosun, we reiterate the commitment to protect the health, safety, and environment of our community. Our responsibility does not end by providing safe products to our customers, but continues by creating a hazard-free environment for our co-workers and neighbors.

To complement this endeavor, Biosun has created internal policies and procedures with the purpose of training personnel, assessing and preventing accidents, and addressing issues that may arise. It is our main goal to pursue quality and excellence in every single operation we perform.

“Working Safely For You”
